# OpenStack Denver, May 2015

Scott Lowe

http://blog.scottlowe.org

# Quick status update

- Fortrust is now our permanent meeting location

- Meetings will be held last Thursday of every month at 6:30pm

- Next meeting is scheduled for Thursday, June 25

- *Logistical note:* please update your meetup.com profile to include at least the first letter of your last name, this will help with name tags

# The tools you're going to need

- Git (and/or Git GUI tools, if desired)

- A GitHub account

- A desktop virtualization product (Workstation, Fusion, or VirtualBox)

- Vagrant

- Access to http://docs.openstack.org/

# What we did at the last meeting

- Installed git

- Set up a GitHub account

- Installed a virtualization product (VirtualBox, Fusion, Workstation)

- Installed Vagrant

# Our goals for tonight

- Verify the Vagrant environment is working correctly for each participant

- Configure the Ubuntu VMs in preparation for OpenStack

- Install database and message queue

- Install Keystone

# Questions & Answers

# Thanks!

*We (the meetup organizers) are always open to your feedback!*
